The NCCOR Measures Registry allows for filtering options for searching the registry based on context, age, and measure type. Context options include Metro/Urban and Small Town/Rural. Age options are Adults, 12–18 Years, 6–11 Years, and 2–5 Years. Measure type includes GIS*, Electronic Monitor, Environmental Observation, Questionnaire, 24 h Dietary Recall/FFQ*, Record or Log, Food Environment, Individual Physical Activity Behavior, and Individual Dietary Behavior.

Data as of January 2014.

Note: The size of each filter section is proportional to the number of measures in the Measures Registry (1000+).

* Geographic Information System
* Food Frequency Questionnaire
