The National Collaborative on Childhood Obesity Research (NCCOR) brings together four of the nation’s leading research funders: the Centers for Disease Control and Prevention (CDC), National Institutes of Health (NIH), Robert Wood Johnson Foundation (RWJF), and U.S. Department of Agriculture (USDA). They work in tandem to manage projects and reach common goals, combine funding to make the most of available resources, and share insights and expertise to strengthen research.

**WHAT DOES NCCOR DO?**

- Provides researchers with tools and resources
- Determines research priorities and furthers emerging areas
- Supports time-sensitive research by promoting new funding mechanisms
- Translates and disseminates findings and resources
- Hosts webinars to connect research and practice communities

**HOW CAN NCCOR SUPPORT YOUR WORK?**

- Use our tools, such as the Measures Registry and the Catalogue of Surveillance Systems, to enhance research and surveillance work. [nccor.org/tools](http://nccor.org/tools)
- View our projects to see how we support and increase the impact of emerging fields like behavioral design and community-clinical engagement. [nccor.org/projects](http://nccor.org/projects)
- Visit our funding opportunities page to find obesity-related funding opportunities including rapid response mechanisms that help investigators study policy and environmental changes in real time. [nccor.org/funding-opportunities](http://nccor.org/funding-opportunities)
- Access our reports, infographics, videos, and other resources to see how we translate complex research findings into creative and engaging visual and written materials. [nccor.org/publications](http://nccor.org/publications)
- Watch our Connect & Explore webinars to connect with leaders in the field, learn more about recent childhood obesity research, and explore the priorities of national funders. [nccor.org/webinars](http://nccor.org/webinars)
