 - Began abstraction of new sleep datasets being added to CSS
- **State of the Science on Measures: Individual PA**
 - Reaching out to potential experts
 - Email Amanda Sharfman (asharfman@fhi360.org) if you are interested in joining

New Workgroup

Identification and Categorization of Evidence Gaps in Physical Activity Research

- This workgroup will collate evidence gaps and perform an evidence-based approach referred to as concept mapping to organize (“cluster”) the research gaps into co-emergent themes and their interrelationships. The goal is to create a single conceptual framework of the current evidence gaps in PA rather than rely on lists from disparate reports. Ultimately, this framework could serve as a tool to guide those working in research, policy, and practice in determining future opportunities in the field of PA with greater efficiency.
- Co-leads: Brama Kowtha, *NIH*; Melissa Green-Parker, *NIH*; David Brown, *CDC*
- Please contact Amanda Sharfman (asharfman@fhi360.org) if you are interested in joining!

Communication Updates
